

ORAL HEALTH, TOTAL HEALTH

Dental benefits that protect more than just your smile

If you are diabetic or pregnant in your third trimester, the Oral Health, Total Health program offers more ways to care for your teeth and mouth — and keep the rest of your body healthy, too.

If you have diabetes

Diabetes increases the risk of cavities, periodontal (gum) disease, tooth loss, dry mouth and infection. If you have been diagnosed with this disease you are eligible for four prophylactic (preventive) cleanings or periodontal maintenance visits per year through our Oral Health, Total Health program. Protect your teeth and gums by enrolling today.

For details on the Oral Health, Total Health program, refer to the dental Member Handbook or visit Member Dashboard, your personalized member website.

If you're pregnant

Pregnant members who have periodontal (gum) disease are more likely to have a premature and underweight baby. Bacteria can enter the bloodstream through the mouth, and the body's response to the infection can trigger early labor.

If you are expecting, you can enroll in the Oral Health, Total Health program to help prevent gum disease. If you've already had two cleanings for the year, you'll be eligible for another cleaning or checkup during your third trimester. This added preventive (prophylactic) visit is covered regardless of normal plan frequency limits. That way, you can receive a dental cleaning during the third trimester, no matter what.
